SPECIAL

A request is being made for this invention to be placed on the special list. The reason being is that there will be an increase for hybrid-powered vehicles in the future. This Stabilizing Battery will help lower the national fuel consumption by making the motor vehicles more energy efficient and will last the operational life cycle of the motor vehicle while not producing hazardous waste like conventional batteries. This invention also features a unique anti-roll system. When the motor vehicle is about to roll over the Stabilizing Battery produces the opposite force that in turn keeps the vehicle flipping over. The sport utility vehicles will be the next to be hybrid powered because of their high fuel consumption. This invention can also save lives by drastically reducing rollovers from their high center of gravity.

I spoke to Richard J. Apley last year. I had showed him what I was working on and he told me to sent in this letter because of the energy effientciey of this invention.

Thank You,

If you have any questions please call me and I will gladly answer them.
